

The Indiana Career Information System (ICIS)

Comprehensive career information delivery system for students and adults

Through arrangement with [intoCareers](#), [Encouragement Services, Inc.](#) (ESI) administers the Indiana Career Information System and provides training, marketing, and support services for this Indiana-tailored comprehensive career information delivery system. ICIS is available to Indiana schools, organizations and individuals through Encouragement Services, Inc. (ESI) at no cost. Users may access the system at www.incis.intocareers.org. To register a school or other organization, go to www.esi.cc/ICISRegistration.htm.

The screenshot shows the ICIS website interface. At the top left is the logo for the Indiana Career Information System (ICIS). Below the logo is the text "Click a button and login to . . .". There are four main categories represented by images: "Middle School" (two children), "High School" (two teenagers), "College" (three young adults), and "Adult" (two professionals). To the right of these categories is a "Resources" menu with the following items: Administration Login, What's New, Products, Technical Information, Materials, and About Us. Below the resources menu is a large image of a woman looking at a computer screen with the text "Reach high Dream deep". At the bottom left of the interface is the ESI logo and contact information: Encouragement Services, Inc., 5931 West State Road 46, Bloomington, IN 47404, www.esi.cc. At the bottom of the page is a copyright notice: Copyright © 2010, University of Oregon. All rights reserved. Created by intoCareers, a unit of the University of Oregon.

Key Features

ICIS offers detailed information about 500+ occupations including the latest state and national wage data, employment outlook, training requirements, related industries and more. Encyclopedic information about Indiana and U.S. colleges and universities and programs of study enables detailed investigation of education and training options. A set of interest, work values, skills, and reality checking assessments helps users to identify and explore life-style choices, occupations, and programs of study. Sorting tools enable identification of colleges, occupations, and scholarships by matching with personally selected criteria. A portfolio system provides users with the capability to store information, assessment results, sort lists, plans, and reflections. ICIS integrates Universal Encouragement Program assessments through its portfolio system, enabling students to create and save their guidance assessments in ICIS.

Additional CIS Content

- Comprehensive career development [curriculum](#) (127 lessons)
- Classroom integration activities (over 600 practical learning activities organized by school subject)
- Job interview preparation
- Resume and cover letter creation
- How to keep a job
- Self-employment
- Military occupations
- Scholarships and financial aid
- Additional [premium content](#) (IDEAS Assessment and Peterson's test preparation products available for site license)

ICIS is available in four environments that are oriented to these user groups: middle school students, high school students, college students, and adults.

Why register? Registered users have administration, reporting, and management tools that enable review of portfolios, managing system settings, and tracking use of the system.
